

# BRISBANE WEST TOY LIBRARY

Ibis using magnetic tiles to build 'home'. I can add the lines to all of them to make them more magnetic looking, less like building blocks.

# BRISBANE WEST TOY LIBRARY

Extends well into different shapes and layouts. The ibis is also great cause his lil beak can pull lots of stuff. Makes this a versatile option for things outside of the logo.

# Brisbane West Toy Library

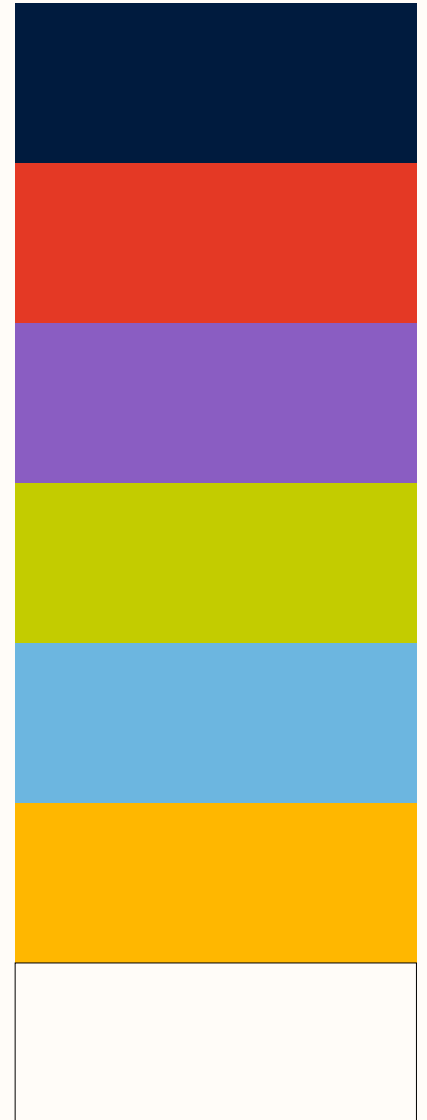

## Brisbane West Toy Library

Ibis in slightly different style. Puzzle piece works as a shape for website etc as well as adding interest to a text only logo (left).

Less reference to toys and playful element. Also need to check if the toy library will have puzzles?

# Brisbane West Toy Library

**Brisbane West  
Toy Library**

Similar idea as ibis, bird friends building with different blocks. I've chosen magpie and cockatoo for their distinctive shapes, but these could easily become a lorikeet and kookaburra.

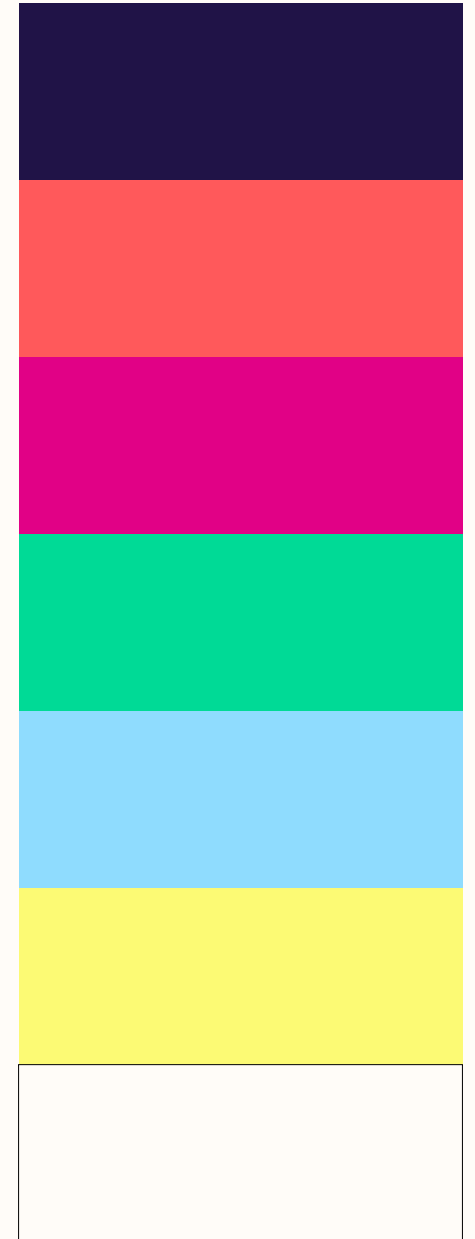

Shapes of the blocks will work well as shapes on the website or social tiles.

**Brisbane  
West  
Toy  
Library**

Toy Library**

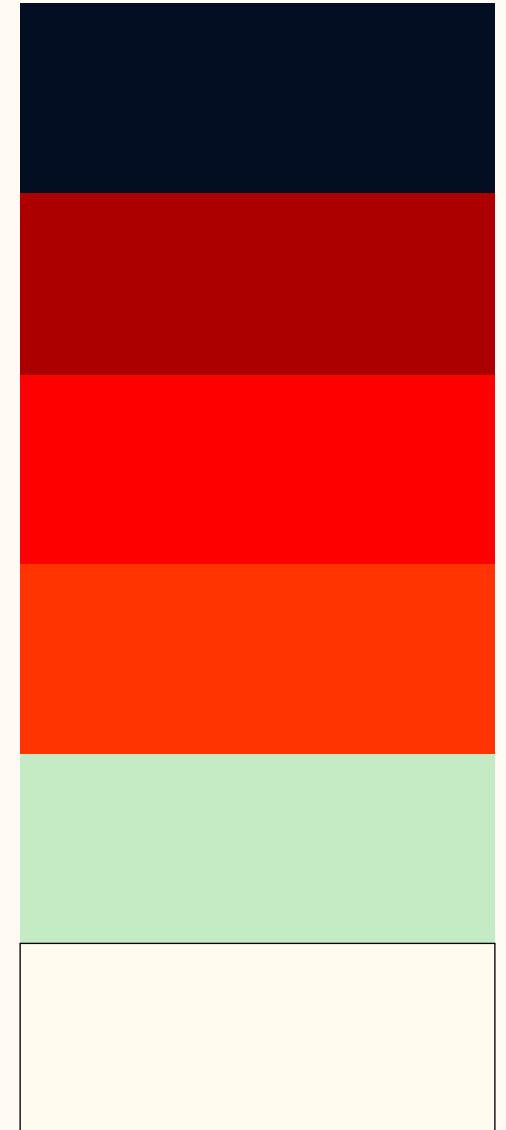

# BRISBANE WEST TOY LIBRARY

Bird friends again with different toys.  
This incorporates the shape of the  
Brisbane River as the train track.

This one could be extended by  
lengthening the track and adding cars,  
other push along toys etc to it.  
Could also reference ride on toys and  
have the birds 'riding' in them for  
posters and socials.

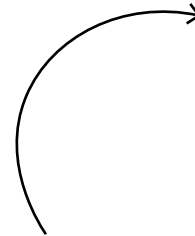

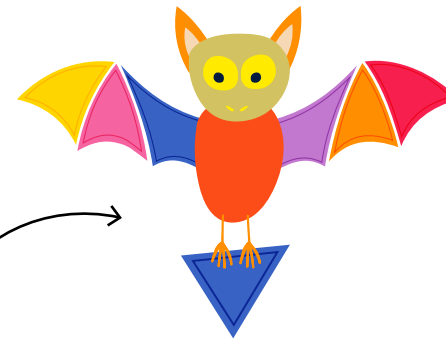

# BRISBANE WEST TOY LIBRARY

# BRISBANE WEST TOY LIBRARY

Magnetic tiles as fruit bat wings. Could build on this with bat holding things in it's feet. Even building 'home' like the ibis version.

Also works well as round version - stickers?
